Model Two Hundred

Modular amplification platform

The Model Two Hundred follows the well established tradition of all MAP products in its ability to adapt to differing system requirements. This high performance two channel amplification platform is capable of resolving minute details while delivering breathtaking dynamics and unparalleled frequency extremes. With its dual power supplies, the Model Two Hundred performs as if it were a monoblock design while retaining the convenience of a stereo chassis. The Model Two Hundred is an elegant solution that will exceed the performance expectations of any audiophile listener.

Built on the concept of MAP (Modular Audio/video Platform), the Model Two Hundred can be a traditional power amplifier or an integrated system level solution by the installation of various MAP modules. The active front panel option can be controlled by any of the Muse system remote controls. Options for analog or digital inputs can be accommodated via the rear panel MAP modules.

The level of pure audio performance of the Model Two Hundred will complement any fine audio or video system.

Specifications

Power:	200 Watts / channel into 8 Ohms 400 Watts / channel into 4 Ohms
Frequency response:	-3 dB at 5 Hz and 200 kHz
Distortion:	less than .05% THD+N
Output impedance:	less than .08 Ohms to 10 kHz less than .12 Ohms to 20 kHz
Input impedance:	10k Ohm unbalanced 10k + 10K Ohm balanced
Power consumption:	standby - less than 10 Watts idle - less than 120 Watts maximum - 1000 Watts

Options

Rotable analog input module

Fixed analog input module

Rear panel MAP slot
